

AERISON CASE STUDY

ASSET SERVICES - MAINTENANCE

Aerison provide a full maintenance to support the full range of the systems that are available. We have long term on going contracts with many of our key clients, including Rio Tinto; BHP Billiton and Alcoa Alumina.

The services that are offered in relation to maintenance are generally conducted in accordance with the requirements of our clients existing maintenance programs in relation to conducting preventative maintenance. In the event that the clients systems are not deemed to be adequate, Aerison have in house resources capable of reviewing the requirements to develop a suitable maintenance strategy to suit the clients' requirements.

**Project
Location**

Dust Collection Maintenance
Tom Price, Brockman, Yandi
Western Australia

Client

Rio Tinto Iron Ore

Key Feature: Full time site presence at Tom Price to maintain the original 40+ year old system, as well as new systems, installed by Aerison in 2007. The maintenance works includes run and stop inspections, breakdowns and all preventative maintenance routines. A key factor of the contract is the improvements to the systems to improve reliability forced ventilation systems and engine exhaust muffler.
